Powder Coated, ventilated material,
easy to clean, padded headrest.
PRESSURE CARE MATTRESSES

MS–ARSOS-IV ICU Stage IV Pressure Mattress + Pump
- Maximum patient weight up to 150 kg (24 st)
- Choice of static or alternating pressure, therefore usable in large variety of illnesses
- Extreme low noise and vibration thanks to built in AVS (Anti-Vibration-System)
- Energy saving feature/start-stop-automatically
- Adjustable cycle times / Acoustic and visual alarm / Power Cut alarm- CPR valve opening / Waterproof with cover

Invacare Premier High Risk Mattress
Exceptional pressure reduction & patient comfort. Uniquely conforms to the profile of an electric ward bed. Patented glide system significantly reduces potential for tissue damage via shear. Features a deep contoured insert pad to maximize body contact area and optimize pressure reduction. A quality product for medium to high risk patients. Waterproof cover.

MS-ALTPM Alternating Pressure Mattress + Pump
Alternating Pressure Air Mattress. Cell tube style alternates on 12 minute cycle. Waterproof with detachable cover. CPR valve

MS-Ripple Stage 1 Pressure Mattress + Pump
Ripple style mattress for short term use. Stage 1 Pressure sores. Waterproof with detachable cover

MSD12 Modular Mattress 36D
190 x 910 x 150mm
Medicare fabric which allows air to ventilate keeping the mattress cool. Waterproof and urine resistant. Recommended for use in ICU, Hi-Care, Frail-Care, Cardiac and any unit where the patient is bedridden for extended periods of time. Also ideal for home use.
PATIENT TRANSFER - HOSPITAL MATTRESSES—POSITIONING CUSHIONS & SUPPORTS

PATSLIDE— Patient Transfer System
The Safest Way to Transfer Patients
- Proven in hospitals internationally
- Ultimate in patient safety & comfort on transfer
- Smooth, upper surface provides low resistance, allowing easy transfer
- Non skid insert on the under surface grip firmly onto the bed, operating table or trolley.
- Easy to position, lightweight (5kgs) & flexes to facilitate movement
- No sharp edges or protrusions

Hospital Mattresses

Memory Foam Laminate Mattress
Heat sensitive conforming foam with slow memory release to model the shape of the body, may also enhance stability. Waterproof, 2 way stretch cover. Memory foam 20mm on both sides plus laminate foam.

Standard Hospital Mattress
Varied high density laminated foam. Waterproof, zip split on both sides. 1980 x 910 x 130mm

Standard Hospital Mattress
Varied high density laminated foam with a convoluted (egg crate) top surface for added comfort. Waterproof, zip split on both sides. 1980 x 910 x 150mm

Wheelchair Platform Scale MSPTM-500
Safe & secure
Capacity up to 500kgs
Ideal for Bariatric patients

Chair Scale MS-BW3136
Capacity 200kg / 100g
Functions: Zero; Tare; Hold; Unit; Recall; BMI. Easy lock, no slip rear wheels, lift away armrests, foldable footrest.

Physician Scale MS-BW110-H
Weight / Height Automatic BMI Capacity 200kg

Physician Scale MSSW-4632
Battery Back Up Max Weight 200kg Weight/Height

Digital Paediatric Scale MS-BW20.
Newborn up to 20kg
0 to 10kg/5g—10 to 20kg / 10g
Tray size 650 x 265 x 100mm

Digital Paed/Baby Scale MS-BW2010
Large platter may be removed for standing weighing of children under 20kg. Display LCD

Manual Dial Scale MS-GM-4615
Max Weight 160kg Graduation 1kg

Mobile Suction Unit + Battery Back Up MS-JX820D
Flow rate: 20L/Min /Cap 1000ml. Storage bottle: Single/Double. Battery Duration >30minutes. Noise 65cB(A)

Suction Unit Low Vacuum MS-YBRX-1A
Continuous drainage for air or liquid. Vacuum level adjustable.
Max Vacuum .29KPa(150mmHg)
Water Capacity >1500ml/min

Mobile Suction Unit + Trolley MS-YX-932D
Flow rate: 32L/Min Storage bottle: 2000ml x2 (Glass) Can modify for polycarbonate
Hydrocolloid:
Hydrocolloid dressings are used on burns, light to moderately draining wounds, necrotic wounds, under compression wraps, pressure ulcers and venous ulcers. A hydrocolloid dressing is non-breathable and adheres to the skin, so no separate taping is needed. Convatec Comfeel Plus, Duoderm, Granuflex, and 3M Tegaderm Hydrocolloid.

Hydrogel:
Hydrogel dressings are used for wounds with little to no excess fluid, painful wounds, necrotic wounds, pressure ulcers, 2nd degree burns and infected wounds. By providing moisture to the wound, hydrogel dressings create a moist healing environment, which promotes granulation, epithelialization, and autolytic debridement. The high water content of hydrogel dressings cools the wound, producing pain relief that can last up to 6 hours. 3M Tegaderm Wound Filler, S&N Intrasite & Solosite, 3M Tegagel, Convatec DuoDerm Hydroactive Wound Gel.

Alginate:
Alginate dressings are used for moderate to high amounts of wound drainage, venous ulcers, packing wounds and pressure ulcers at Stage 111 or IV. 3M Alginate; Smith & Nephew Algisite;

Foam:
Foam dressings are highly absorbent and are available in a range of different shapes, sizes and compositions. They can be used as a primary or secondary dressing on a variety of wound types, from leg ulcers to cavity wounds where exudate is a problem. 3M Tegaderm Foam; Hartmann Permafoam; S&N Alleyvn; Convatec Biotain
MOBILITY / REHABILITATION / SENIORS

B-Active Standard Wheelchair

Sizes 16" & 18" / Highly Adjustable
Swing Away Armrests / Padded, Swing Away Knee Pads / Detachable Headrest / Centre of Gravity Positioning

The Benefits of a Stand Up Wheelchair

Psychological Benefits:
Increased Independence:
Simple tasks such as opening a high cupboard, fishing, golfing, braaing ……..
The list is endless.

Social Status:
Finally interact normally with peers and family. Anyone using a standing wheelchair will be able to do jobs in the home & workplace that previously they were unable to undertake due to the restrictions of the chair.

Cognitive Abilities:
The increased circulation derived from standing increases a person’s cognitive ability to think and their memory and focus becomes sharper.

Self Esteem:
Tenfold increase in wellbeing. No more looking up at people or people looking down on you – finally the playing fields are level and eye to eye contact, stand up hugs, looking in a mirror etc are all fully accessible.

Physical Benefits
Pressure Sores:
One of the major benefits is the weight distribution which improves the healing of existing pressure sores and unquestionably is a preventative measure against any sores occurring.

Muscle Spasms/ Contractures:
Standing helps relax the muscles and reduces spasticity. It also stretches and exercises muscles.

Circulation:
Increased circulation as the body changes posture. Blood flow is returned to normal.

Bowel Function/Urinary Tract Infections:
Studies have proved a standing chair reduces the incidence of urinary tract infections & increases bowel function.

Passive / Active Motion Limb Rehabilitation

B-Active MK3 Passive / Active Motion Limb Rehabilitator

- Personalised low stress workouts that can be used anywhere.
- Adjustable speed and resistance gently and progressively strengthens both arms and legs

Recommended for ACTIVE (Arms/Upper Body) OR PASSIVE (Upper Body)

The B-Active MK3 has a lightweight compact design, adjustable speed & resistance, a timer switch PLUS a multi-function LCD display readout which provides scan, time, count, total count and calories burned. A non-skid mat and interchangeable handgrips along with remote control is included in the package.

Suitable for:
- **Quadriplegics / Paraplegics**
- **Stroke Victims; Neurological Disease Sufferers; Diabetics; Seniors; Convalescing / Rehab Patients**

Our B-Active passive rehabilitation machines are of the highest quality with built-in features such as:
- Automatic cut off / Adjustable speeds
- Reverse speed / Timer
- LCD Display / Speed Settings
- Passive PLUS Active Motion with Remote Control

The Benefits of Using a B-Active Passive Motion Rehabilitator

- Improves circulation by preventing blood from pooling.
- Relieves swollen ankles and legs (oedema/edema).
- Increase in cardiac capacity, allowing oxygen rich blood to pump throughout the body.
- Decrease in muscle spasms (highly beneficial for quadriplegics / paraplegics).
- Prevents stiffening of joints and reduces joint pain caused by existing stiffness.
- Improves contractures caused by atrophy and shortening of muscles.
- Releases endorphins, promoting relaxation and a ‘feel good’ feeling within the body.
- Relieves stress, assists in relaxation and assists in regular sleeping patterns.
B-Active Active Exercisers

Restores impaired muscle strength, circulation & co-ordination to arms and legs. Tension spring provides variable resistance. New Model Folds for easy storage.

Choose from 2 models

Easy Active

OR

The Adaptive Active (has special grips and wrist straps for those with no or little grip). Suitable for Quadriplegics and stroke victims.

The ONLY rolling beach chair designed to float in the water—whatever the depth.

Recline Feature

Width of Seat – 460mm

Width of Back Rest – 380mm

Shoulder seat belts

Foot straps

Foldable for transporting
What is microFET

The wireless microFET was developed to eliminate the subjective nature of musculoskeletal testing by giving accurate and quantifiable results. microFET technology allows the clinician to document, reinforce, and support their treatment plan. microFET technology is used and clinically proven in hospitals, universities and is also suitable for all medical professionals.

**microFET2:** Digital Handheld Muscle Tester. The wireless microFET2 is a dynamometer that fits in the palm of your hand – a Palm Gauge. A variety of attachments ensures proper muscle isolation for increased testing validity.

**microFET3:** Muscle Testing Dynamometer and Range of Motion Inclinometer. The wireless microFET3 is a dynamometer and inclinometer in one device. This gauge can perform two evaluations when diagnosing and treating muscular disorders.

**microFET5:** Intelligent Single Inclinometer. The wireless microFET5’s intelligence is its pre-programmed automatic calculations of spinal range of motion. It can also be used in “simple mode” for extremity range of motion testing.

**microFET6:** Dual or Single Range of Motion Inclinometer. The wireless microFET6 gives the clinician a choice of using a dual or single inclinometer to measure range of motion.

**microFET HandGRIP:** microFET digital HandGRIP dynamometer for healthcare professionals who want to measure just handgrip strength forces to test and document grip strength deficits and to evaluate consistency of effort.
